

Flourish at Home

We are delighted to introduce our 'Flourish at Home' **online/remote** programme. It is an incredibly challenging time for all, and we are doing our utmost to continue to support families during school closures and the uncertainty of the coming months.

We are freeing up time for our specialist teaching staff to enable them to deliver online 1:1 support and groups sessions (maximum 6). These will be in Maths, English and Science. In addition, we will be offering specially designed fun 'Flourish' sessions that are engaging and designed to help with general well-being.

Our academic offerings are focused on children from Years 3-8. We will place children in groups of similar ages. However, we recommend connecting with your child's classmates or friends who are in the same class/year group to form your own group.

We will ensure that any resources needed are emailed direct to you and **no email communication will directly occur between our DBS checked Flourish staff and your child**. We may share previously vetted education video and website links to aid the learning process. Visuals appropriate to any activity may be shown by the practitioner during video calls.

Please email: ben@flourishatthefarm.co.uk to register your interest. We will get back to you asap with programme options and further information for you to consider.
